LIVEWORKSHEETS

Population density refers to the average number of individuals living per square kilometer or square mile. The world's total area is approximately 197,000,000 sq miles, and the Earth's population is about 7.5 billion. This means that the population density of the world is around 38 people per sq mile or 14.7 individuals per sq kilometer. The population density of cities around the world varies greatly. The most densely populated city in the world is Manila in the Philippines, where 41,515 people live in each square kilometer.

Manila is the earth's most densely populated city and the capital city of the Philippines. Manila has about 1,780,148 residents. The city has a population density of about 41,515 people per square kilometer. It is the first chartered city in the country that gained autonomy on June 18, 1949. Miguel Legazpi founded the city of Manila on June 24, 1571. Manila is the most populous city in the Philippines and the most populated ones in Southeast Asia.
