Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the following questions.

Computer technology is an increasingly important aspect of modern school life and has dramatically changed the way teachers and students go about their daily activities.

For students, computer technology has provided an indescribable wealth of resources, information and knowledge. Since the introduction of the internet, students are now able to access information on whatever subject they want, wherever they want. Resources include journals, articles, e-books, practice tests and examinations, model answers and research findings. Research has also suggested that computer technology has helped students to improve their grades in other subjects, most notably science. Practically, students can work much faster using a computer which enables them to do more study in the same period of time.

Computer technology has enabled teachers to make their lessons more interactive and therefore more interesting and rewarding. ***This method*** has also been shown to improve pupil performance as lessons are more memorable and therefore students are able to retain information more effectively. Teachers, like students, can also find a whole host of resources on the internet which can provide inspiration and advice for classes. They are also able to recommend good resources to students to further encourage and stimulate their learning.

46. What is the best title of the passage?

A. How Computer Technology has changed school life

B. Solutions to Computer Technology

C. Examples of Computer Technology in Education
