

Network	LAN, WAN or the Internet?
 The diagram shows a Local Area Network (LAN). Five computers are connected to a central horizontal blue bar labeled "Ethernet". The computers are: an IBM Compatible desktop monitor, an iMac, a Server tower, a Laptop computer, and another IBM Compatible desktop monitor.	
This type of network lets your teacher save their Computer Science files to OneDrive.	
 The diagram shows a Wide Area Network (WAN). Two computer monitors are shown, one at the top and one at the bottom, connected by a green line that passes through a globe. The globe has green lines connecting different regions, representing a global network.	
Cash machines throughout the UAE for a bank are connected to this network.	
You can play an online game against someone in Mexico using this type of network.
