LIVEWORKSHEETS

Write the numbers to order the reproductive process and complete:

		When?
	The embryo becomes a fetus with arms and legs. It is the size of a small seed.	
	The baby is ready to be born	
	An egg is fertilized by a sperm	
	The baby breathes on its own and gets nutrients from its mother's milk.	
	The fetus has all its organs	
	The baby moves down the vagina.	
	An embryo develops. It gets nutrients and oxygen from the mother through the umbilical cord	
	The egg divides again and again. It becomes attached to the wall of the uterus.
