MY STORY ABOUT THE COVID PANDEMIC

A pandemic started on 2019. A virus spread rapidly, and our life changed. We **used to** go to school, but suddenly we started to take online classes. People **used to** go to work, but they had to do home office. Before the pandemic, we **didn't use to** have as many healthy habits, as we do now. For example, I **didn't use to** do exercise, and I started to do it in my house watching YouTube videos. Also, people **didn't use to** wash their hands as frequently as they do now.

Cities were like a dessert, without people and in silence. Before COVID, we **used to** go to the supermarkets and malls, but all of a sudden, we started to shop online. We also **used to** make parties and family reunions, but we all were afraid to infect our loved ones, so we started to make videocalls.

Even though the pandemic has been difficult, I think we **didn't use to** care about each other as much as we do now. Also, we **didn't use to** appreciate our loved ones, hugs, kisses and our life as we do now. Hopefully, this crisis will change us for the best.
