2 Let's Practice

Exercise 1: Read and write Joe, Tom or Jess

Joe, 11

I think robots will do everything for us. They'll do all the dangerous jobs, like firemen's jobs, and all the housework. Robots will listen to us and talk, but they won't have feelings like people. I think robots will help us with our homework, too. That'll be great!

Tom, 10

There will be more people on the Earth in the future because people will be healthier and there'll be less illness. I think they will get richer, too. More people will buy cars and this means that our roads will be too crowded. So, I think we will have new roads in the sky and our cars will be very different, too. Cars won't use petrol anymore. I think they'll use energy from the sun.

Jess, 10

Sometimes worry about the future. I think it will be hotter and there will be more storms. It will be harder to grow food. Animals like polar bears may become extinct because the snow where they live will melt. There will be a lot more sea and a lot less land. This will make our countries very crowded, especially if people start to live longer.

1. People will travel on roads in the sky.
2. Robots will help students to do their homework.
3. The countries will become more crowded.
4. Roads will not be wide enough.
5. There will be more nature disasters.
6. Many animals will disappear on the Earth.
7. People will live longer.
