A ☐	ENCYCLOPAEDIA ENTRY
B ☐	OPINION ESSAY
C ☐	ADVERTISEMENT
D ☐	INSTRUCTIONS
E ☐	NEWSPAPER REPORT

1

The S5022 is for practical consumers who want a powerful computer that looks good and works well. It's extremely light and comes with an attractive leather bag which makes it easy to carry around. The most remarkable feature of this machine is, of course, the price. This model is certainly the best in terms of price, style and power.

2

"Here, Professor Aronnax, are the different dimensions of this boat now transporting you. It's a very long cylinder with conical ends. It noticeably takes the shape of a cigar, a shape already adopted in London for several projects of the same kind. The length of this cylinder from end to end is exactly seventy metres, and its maximum breadth of beam is eight metres. So it isn't quite built on the ten=to=one ratio of your high=speed steamers; but its lines are sufficiently long, and their tapering gradual enough, so that the displaced water easily slips past and poses no obstacle to the ship's movements."

3

To sum up, while I agree that giving laptops to every student would help them learn about technology, in my opinion students must learn how to spell and do maths in the same way as their parents. Only then should they be allowed to use computers in the classroom.

4

The students are calling for the government to spend more money on technology in the classroom. "We've waited too long", one student leader said, "and we want a laptop for every student at the school!" Students will continue their protest until their demands have been met, she continued.

5

Ivan Ivanovich Polzunov developed the first steam engine in Russia and the first two-cylinder motor in the world. After graduating in 1742 from the mining school in Ekaterinburg he trained with Nikolay Bakharev. In 1748 he went to live and work in Barnaul. He died in 1766, just days before his invention was finished.

6

'Listen Now' lets you listen to your chosen programme via the BBC's Radio Player. In order to do this you need to be online. When you click the *'Listen Now'* link, the Radio Player should appear in a small new window, and the audio should start playing automatically. If you are having problems with *'Listen Now'* and the Radio Player then try our Audio Help section.
