23. After making your selection, click the OK button.

24. The Print windows will open. Adjust your settings for your printer and print your document.

Using the Mail Merge Wizard to create your own list of recipients.

If you do not have an exiting list of names and addresses saved as an Excel file or Access database, you can create your own list of recipients. When creating your mail merge using the wizard, you will be prompted to select recipients.

1. Select the option **Type a new list.** (1)

1

2. Click on Create

3. The New Address : List windows will appear. Type your recipient information into the table provided, filling in the fields as needed (2)

3

4. To create a new entry, click the **New Entry** button.

5. To add custom columns to your table , click the **Customize Columns.**

A. The Customize Address List window will open. To add new fields, click on **Add.**(5)

B. The **Add Field** window will appear. **Type** a name for your field in the **box** provided.(6)

C. Click on **OK**.

6. To delete an entry, elect the entry from the table and click on **Delete Entry**. 

7. When you finished creating your recipient list, click the **OK** button.

8. You will be prompted to save your list, to your computer. Once saved, the **Mail Merge Wizard** will take you to the **Mail Merge Recipients** window to continue the mail merge process. (*See in previous lesson No 6 Step 14*) under *Using the Mail Merge Wizard* for more information.

Matching Fields

If some of the information you imported to the Wizard is not properly matching up with the correct fields, you can assign the information to the proper field by using the Match Fields tool. Before using the **Match Fields** tool, you will have to import a *file/database* for your recipients, or have created one using Word. The following explains how to match fields:

1. Click the **Mailings** tab. (1)

2. Under the **Write & Insert Fields** grouping, click on **Match Fields**.(2)

3. The **Match Fields window** will appear and display a list of fields with their match to you selected file/database (3).

4. Next to the **field** you wish to match, click on a **dropdown list** (4).

5. A list of headers from your imported file/database will be listed. Select the header that is the closest match to the existing field.(5)

6. When finished matching fields, click the **OK** button.

Questions.

1. Explain the steps to create your own list of recipients

2. Explain the steps for Matching fields.

3. How do you add a name to the address book?
