Activity 1

Identify the structure of analytical exposition texts below and give a name to its structure!

Text 1

Management of trash is very important in Indonesia. As one of the countries with big amount of trash from many sectors, proper management is necessary.

Firstly, it is important to provide healthy environment. When the trash is not managed well, it will create area where bacteria can live.

Moreover, it can cause some health issues, and breathing issues become one of them that can be caused by bad smell of the trash. Furthermore, bad management of trash can lead to flood. When it is not managed well, trash can block the flow of water.

As the result, water debit can increase during the rainy season and the channels of water cannot deliver the water well. That is why it is very important to manage the trash and it is better to promote the recycling process.

Text 2

Hand sanitizer becomes important thing during the pandemic of COVID-19. The chemical substance in the sanitizer can help you cleaning your hand easily without using water and soap.

One of the reasons is that you will always use your hand to touch something and make contact with other people.

During the interactions, virus can be transmitted, and applying the sanitizer on the palm of hand is safe way to kill the virus. Then, availability of water and soap sometimes cannot be obtained easily.

It will also take time when you have to go to toilet to wash your hands. With hand sanitizer, you can easily clean your hands and avoid the threats of virus.

In conclusion, it is highly recommended to always bring the sanitizer whenever you go.

Text 3

Currently, it is still not safe to reopen the school in the midst of pandemic. There are some reasons for it.

Firstly, teachers are the only persons who already get vaccinated, while the students are still not protected from the virus. Then, being vaccinated does not mean that they are fully safe since there are still variants of evolved virus in which there is still high risk of being infected.

Moreover, it is not always easy to manage the students to they want to follow the protocol. Even, there are still proofs showing the teachers do not follow the protocol.

By considering these arguments, it is better to stop the idea of reopening the school.

Do little things with great love!
