

Lesson 8 Saving a Chart as a Template & Adding Labels & Titles

If you have added chart elements and styles that you would like to use when creating charts in the future, you can save the chart as a template.

1. Select the chart type that you would like to save as a template.
2. Right-click the chart, then select **Save As Template .1**

1

3. The save **Chart Template** window will appear, In the **File** name field, type a name for the chart template. 2

2

4. Click **Save**.
5. The chart template will appear in the charts **Templates** folder 3
6. The template can be found on the **All Charts** tab in the **Insert Chart** or **Change Chart Type** window 3 . You can apply a chart template the same way you would any other chart.

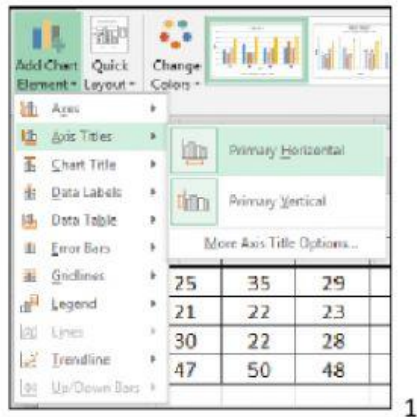

3

Adding an Axis Title

To add Horizontal Axis Title

1. Select a chart.
2. Click the **Design** tab.
3. Add **Chart Element 1**.
4. Select **Axis Titles**, and the click **Primary Horizontal 1**
