Review: the gTar by Incident

If you've ever picked up a guitar for the first time and tried to play a song, you know how frustrating it can be. Well, the gTar changes that ... completely!

When I first heard about the gTar, I was sceptical. Could it really make guitar playing as simple as the company claimed? Once I'd tried it, though, I was blown away. This isn't a cheap, plastic toy; it's made of solid wood and feels like a genuine electric guitar. Pop in your iPhone, activate the app, choose your song and start playing. It's that easy!

Priced at \$399, it's an affordable instrument for hobbyists, amateurs and anyone who wants to grasp the essentials of guitar playing.

A

Play your favourite songs in minutes!

NO LESSONS NEEDED!

The gTar by Incident is a fully digital guitar that lets you play music quickly and easily with the help of flashing, coloured lights and apps from your iPhone.

Interactive fretboard

- lights up in different ways to show you where to put your fingers
- tracks how well you're doing as you play

The gTar app

- designed to help anybody start playing the guitar as quickly as possible
- just pick a song and start playing
- three levels of difficulty

FAQs

Where does the gTar get power from?

The gTar has a battery that lasts between 6 to 8 hours when it is fully charged. To charge the gTar, you can use the USB charger that is included or you can plug the gTar into any standard USB dock on a computer.

What phones will it work with?

Currently the gTar is compatible with the iPhone 4/4S and the iPhone 5. We hope to make it possible to use with other smartphones in the future.

How do I get the gTar app?

The gTar app is available for free in the App Store.

Will this teach me how to play on a 'normal' guitar?

We designed the gTar to be virtually identical to a normal guitar, so playing it will teach you the basics that you would need to play on a regular guitar.

For the four short connected texts, the last questions usually refer to something that the texts have in common. If the question tells you which texts to look at, like question 6, underline the key words in the question and then look for similar ideas in the named texts. If, however, it is like question 7, you need to look at all of the texts in order to figure out the answer.

Questions 6 and 7 refer to sections A, B, C and D.

- 6 Which sections give information about how the gTar works?
- a A, B and C
 - b A, B and D
 - c A, C and D
 - d all sections
- 7 Who would probably want to buy a gTar?
- a a member of a rock band
 - b someone already learning the guitar
 - c a first-time guitar player
 - d a music teacher

Hi, Jimmy

I've come across something online that I think Bob will really go for.

It's called the gTar. It looks like a real guitar, but it's not a video game like Guitar Hero. The reviews have been great, too. Now, it's not cheap, but if a few of us put in the money, we'll be able to buy it. Here's the link to the company's website. Take a look and let me know what you think.

It's only available online, so we can't test it in a shop, but there's an instructional video on the website.
