

# Finding Factors

I can find factors of numbers.

To find the **factors** of a number, you need to find all the pairs of numbers that multiply together to make a **product**.

$$2 \times 5 = 10$$

2 and 5 are **factors**. 10 is the **product**.

Fill in the missing factors for these products:

|    |   |   |   |   |   |   |
|----|---|---|---|---|---|---|
| 20 | ○ | ○ | ○ | ○ | ○ | ○ |
| 27 | ○ | ○ | ○ | ○ |   |   |
| 12 | ○ | ○ | ○ | ○ | ○ | ○ |
| 15 | ○ | ○ | ○ | ○ |   |   |
| 11 | ○ | ○ |   |   |   |   |

Now list the factors of these numbers:

1. 16
2. 21
3. 23
