Evaluation Criteria: CE.EFL.3.6. Listen and write. There is one example. PART 2 (5 questions)

Class visit to Sunny Farm

Day: …………………………Monday……………………..

1

Farmer´s name: Mr…………………………………………………………………

2

Farmer grows: ………………………………………………………………………

3

Number of fields: ………………………………………………………………………

4

Children will draw: ………………………………………………………………………

5

Class will go to the farm by: ………………………………………………………………………

READING COMPREHENSION (2.5pts) 0.5 e/o

Evaluation Criteria: CE.EFL.3.12.

"Robot Teachers"

It's easy to imagine robot cleaners and factory workers, but **some jobs need human connection and creativity.** But are we underestimating what robots can do? In **some cases,** they can perform better than doctors at diagnosing illness. Could there be a place for robots in education after all?

British education expert Anthony Seldon thinks so. He predicts robots will do the main job of transferring information and **teachers will be like assistants.** Intelligent robots will read students' faces, movements and maybe even brain signals. Then they will adapt the information to each student. It's not a popular opinion and **robots will ever have empathy** and the ability to really connect with humans like another human can.

Robots can teach anywhere and won't get stressed, or tired, or move somewhere for an easier, higher-paid job. Teachers all over the world are leaving because it is a difficult job and they feel overworked. Office workers can use software to do things like organise and answer emails, arrange meetings and update calendars. **Teachers waste a lot of time doing non-teaching work, including more than 11 hours a week marking homework**. **If robots could cut the time teachers spend marking homework and writing reports**, teachers would have more time and energy for the parts of the job humans do best.

Are these statements TRUE or FALSE?

	T	F
1) **Most** jobs can be done by robots or computers.	☐	☐
2) Robots are **always** better at diagnosing illnesses than doctors.	☐	☐
3) One **advantage** of robot teachers is that they don't need to rest.	☐	☐
4) **Robot assistants** could help teachers by marking homework and writing reports.	☐	☐
5) **Some teachers use robots** to reduce their time answering emails and marking homework.	☐	☐
