

THE CRYSTAL QUEST

Level descriptions

Level 1 – The tunnels
 Players have to run through the tunnels collecting **tokens** and fighting any enemies they meet. They can jump over the fire pits and walk across the bridges once they have enough tokens. They must make their way towards the end of the tunnel and have 15 tokens and at least one life **remaining** to make it to the second level.

Level 2 – The maze
 On this level, players continue the game by going along **corridors** and up and down staircases collecting tokens, fighting guards and **avoiding** the **traps**. Each time they fall into a trap they lose a life. Somewhere on this level there are a magic key and a sword. The magic key opens any door. Players must find both and win 50 tokens to continue to the next level.

Level 3 – The cave
 This level takes players into a cave and they must use their tokens to get a torch, and search the cave for anything that may be useful. This is **tricky** because players do not know until they have played this level a few times which items will be useful and will help them to get through the obstacles and out of the cave.

Level 4 – The magic crystal
 On this level, players have to find and destroy the magic crystal. They must work out how to do this after they have made their way past the traps, which include a **pit of flames**, some spider's webs and of course, the dragon.

Read the text and mark the sentences *T* (true) or *F* (false).
 Explain the words in bold.

- 1 Tokens help you move from Level 1 to 2.
- 2 The sword will help you get out of the cave on Level 3.
- 3 Any key on Level 2 helps you open the door.
- 4 The magic crystal is in a spider's web.
