Listen and read the following text, and complete the chart.

Roller Coasters

There are many categories to classify roller coasters: speed, originality, how much terror they cause, but none as important as height.

Next we present you the top 5 of roller coasters with the tallest drops of the planet.

Fury, with a total height of 99 meters and located in North Carolina is on the last place of this list of roller coaster

There are two roller coasters in the fourth position, due to a draw. These are the "Tower of Terror" with a 99.97-meter drop. It is in Australia and the "Superman: Escape from Krypton" in California has the same height.

In number 3 you will find the "Red Force" in Spain. It has a drop of 105.76 meters.

In the second place is "Top Thrill Dragster" located in Ohio. This roller coaster has a drop of 121.92 meters and a total height of 128 meters.

Finally, the winner, the roller coaster with the highest drop in the world is "Kingda Ka" in New Jersey. Its drop is 127.40 meters and its total height is 138.98 meters.
