CW_ Grade 2_Add Numbers up to 1000

Add Numbers using properties of Addition

Properties of Addition-

Commutative Property	You can add in any order	$2 + 4 = 4 + 2 = 6$
Associative Property	You can group the numbers in any combination	$1 + (3 + 4) = (1 + 3) + 4$
Identity Property	The sum of any number and zero is the number	$6 + 0 = 6$

1) Compute the following addition equation mentally using the addition property learnt.

$$43 + 0 = \underline{\hspace{2cm}}$$

$$5 + (4 + 6) = \underline{\hspace{2cm}}$$

$$7 + 3 = \underline{\hspace{2cm}}$$

$$456 + 0 = \underline{\hspace{2cm}}$$

$$2 + (1 + 9) = \underline{\hspace{2cm}}$$

$$6 + 6 = \underline{\hspace{2cm}}$$

2) Identify the addition property used in each question.

$$2 + 0 = 2 \quad \underline{\hspace{4cm}}$$

$$52 + 0 = 52 \quad \underline{\hspace{4cm}}$$

$$45 + 20 = 20 + 45 \quad \underline{\hspace{2cm}}$$

$$3 + 5 = 5 + 3 \quad \underline{\hspace{2cm}}$$

$$(32 + 4) + 7 = 32 + (4 + 7) \quad \underline{\hspace{2cm}}$$

$$(5 + 7) + 9 = 5 + (7 + 9) \quad \underline{\hspace{2cm}}$$
