

## EXERCISE 7

Match the correct pictures with the sentences describing the process of producing tea.

1. First of all, the tea is grown for three years.	
2. Then it is picked by hand.	
3. After that, the tea is left to rest either outdoors or indoors.	
4. Next, it is put in a drying machine where it is dried for two hours. The temperature during this stage of the process should be just over 260°C.	
5. After this comes the packaging stage. The dried tea is made into teabags and the teabags are put into boxes.	
6. The boxes are then packed into lorries. The lorries deliver the tea to the supermarkets.	
7. Finally, customers buy the tea when they are shopping.
