TEETH

You will have 32 of them when you grow up. They are white and shiny, and they help you to eat. They are your teeth, of course!

Babies are not born with teeth. They get them when they are about six months old. Little kids have 20 baby teeth. They fall out when you are about six years old.

Then, you begin to grow adult teeth. They are larger than your baby teeth. They help you to bite into apples and sandwiches. They help you to chew, too.

Make sure to take care of your teeth. Brush your teeth after every meal. Floss between them at least once a day. And don't forget to visit the dentist twice a year. This way, you will always have a bright white smile!
