MEGAPOLIS

I really enjoyed this game. The aim is to build a city, but there are a lot of problems to solve along the way.

1 **How many** houses, hotels, roads and factories can you build? 2 **How much** money and energy do you need to build them? Players use money called 'megabucks'. You start with just 3 **How much** megabucks, so you must spend them carefully. It's difficult to build a city on your own, so 4 **How many** players work together. For example, if you have only got 5 **How much** energy, you can borrow or buy 6 **How much** electricity from a neighbour. But selfish and greedy players don't make 7 **How many** friends. If they haven't got 8 **How much** money or energy, no one helps them and they can't finish their city. So it's best to be friendly to the other players!
