

24. Read the text. Choose the right words and write them on the lines. (8 TEST 3)

Example We live on one of nine planets. The name of our planet
1 is Earth. The other eight planets are Mars, Mercury,
Venus, Neptune, Uranus, Pluto, Jupiter and Saturn. The planets
2 are like big balls of rock and metal and they go round
the sun. The sun is not a planet, it is a very big star.
3 Jupiter is bigger the other planets and it has got 16
moons. Pluto is the smallest planet, and it is the coldest one because
4 it is very far from the hot sun. Pluto has got one moon.
Mercury is the nearest planet to the sun and it is very hot.
5 Our planet Earth is Venus and Mars but they are very
6 far from us. Rockets take very long time to go from one
7 planet to another. Earth is the only planet things grow
and people and animals live. Some people think that there are people
8 animals on some of the other planets. No one has
9 ever to the other planets.
10 Perhaps people go to visit the other planets in the
future.
