Part 4. Reading.

Read and highlight all the pronouns in this passage. (6 marks).

We visited the new planetarium in the city.

When we got there, a man showed us where to leave our coats and backpacks. A special guide explained the tour to us. I learned many new things. For example, I didn't know our solar system was so big. We counted many moons around some of the planets. Toward the end of the tour, the guide invited me to visit the planetarium again. I will definitely come back someday. We collected our things and went back to school. I asked friends to name a favorite planet. Mine is Saturn because of its many rings. The teacher

wants us to do reports on the planets. I want to report on the planet Saturn, but so does Aquil. We decided to work together on the report. We want to talk about Titan, one of Saturn's biggest moons. We were interested in this moon, because Titan is the biggest moon, bigger than the planet Mercury!
