Part 6

Questions 27–32

For each question, write the correct answer.
Write **one** word for each gap.

The Koala

We're leaving Australia soon and we've just met that well-known symbol of Australian wildlife, the koala. I've always called them koala bears, but they are a member (27) the marsupial family.

They are only two centimetres long when (28) first come into the world and spend the first six months living in their mother's pouch before moving on to her back for a further six months.

They live on eucalyptus leaves, which they eat huge amounts of, up to 1 kilogram (29) day. One benefit of this diet is that they rarely need to drink water as they get (30) from these leaves. They can live for up to 15 years in the wild and as long as 20 years when cared for in zoos or nature reserves.

Unfortunately, as more of these eucalyptus trees (31) cut down, we are seeing a fall in (32) number of koalas.
