

Κάθετες Διαιρέσεις

1. Κάνε τις κάθετες διαιρέσεις, και από δίπλα την ευκλείδεια διαίρεση, όπως στο παράδειγμα

$$\begin{array}{r} 18 \\ 3 \overline{) 5} \\ \underline{3} \end{array}$$

$$18 = (3 \times 5) + 3$$

$$\begin{array}{r} 28 \\ 5 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 48 \\ 9 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 55 \\ 9 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 69 \\ 7 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 68 \\ 8 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 39 \\ 7 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 68 \\ 7 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 59 \\ 7 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$

$$\begin{array}{r} 38 \\ 6 \overline{) } \end{array} \quad \underline{\quad} = (\underline{\quad} \times \underline{\quad}) + \underline{\quad}$$
