

SVOLGI LE DIVISIONI IN COLONNA

[illegible]

The diagram shows a sorting network for the permutation 6153. It has three inputs at the top, each with a colored arc above it: green, red, and blue. The network consists of a vertical line with several horizontal bars representing comparators. To the left of the vertical line, there are three boxes: a single box at the top, and two boxes stacked vertically below it. To the right of the vertical line, there are three boxes stacked vertically. The number 'r' is located at the bottom right of the diagram.
