### Reading Strategy

When you do a multiple-choice task, decide whether each question is about the whole text or a specific part. If it is about a specific part, find the relevant sentences in the text and underline them.

3 Read the Reading Strategy. Then read the text again and choose the correct answers.

- 1 According to the text, most people
  - a don't value apps very highly.
  - b don't know what the main benefits of apps are.
  - c use apps mainly for fun and social situations.
  - d think apps are useless in dangerous situations.
- 2 The main purpose of the Safety Tips app is to
  - a prevent an earthquake like the one in 2011.
  - b warn people who are visiting Japan about earthquakes.
  - c warn Japanese people about earthquakes.
  - d warn business people about earthquakes.
- 3 Jenny had problems
  - a because no one told her what to do after an earthquake.
  - b because she couldn't understand the advice on Japanese media.
  - c because there was no information for tourists about what to do in an earthquake.
  - d because her Japanese colleagues didn't know what to do.
- 4 At the moment, the app
  - a is available in a number of languages.
  - b is available at airports and tourist information centres.
  - c warns about earthquakes but not about tsunamis.
  - d is in English, with Japanese phrases.

## STAYING SAFE

When you ask most people about the benefits of apps on their smartphone, they say they use them to play games, surf the net, keep in touch with people and organise social events. But Jenny Harlow, a scientist from London, has got an app that does something much more important: it warns her when she is in danger. The app is called Safety Tips and it gives users real-time earthquake and tsunami warnings. The Japan Tourist Agency had the idea for the app after the 2011 earthquake in Japan, when many foreign tourists in the country were confused about what was happening and what they should do. Jenny was on a business trip to Japan when the earthquake struck. 'Although there are a lot of earthquakes in Japan, it was the first time I experienced one. All the warnings and information on the internet, radio and TV were in Japanese, and I couldn't understand. It was really confusing and I didn't know what to do.' She had to rely on Japanese colleagues to help her. The Safety Tips app sends an alert to users when a major earthquake happens, and also tells them if a tsunami is likely to arrive at the coast. The app gives lots of tips about what to do, where to go and how to stay safe, as well as a list of useful Japanese phrases such as 'Is this an earthquake?' and 'Is it safe here?' Importantly, all the information is in English, and there are plans to add other languages. The Japan Tourist Agency plans to advertise the app at airports and tourist information centres in Japan. In order to get the app, people visit a website and download it. 'I'm coming to Japan again next year and I will definitely watch out for alerts from the app,' says Jenny.
