

Read the sample pitch to answer some questions.

Good morning, my name is Wendy, and I am part of the group called "Super girls".

Today, I will present the prototype of a fantastic solution that we created, and it is called "Wheelchair elevator".

Our challenge was to improve the quality of disabled people's life. We started investigating and found out that people in wheelchairs have big problems when they need to take any transportation. That's why, we found an interesting solution. With this Wheelchair elevator they could get into the bus or taxi easily. Also, you can control it with your smartphone, so you won't need to ask for help.

In conclusion, I hope you could invest in our project. We promise you won't regret! So, would you like to join us and be part of this wonderful solution? We're sure by 2025 disabled people will be using the wheelchair elevator.

Thanks for your attention.

1. What's the name of the prototype?
2. What can people do with it?
3. Which disabled people will it give solution?
4. It will be easy or difficult to manage this device?
5. What the "Super girls" need to make their project?
6. What title will you put to this text?
7. What do you think about this prototype?
