My first job

I got the job in environmental research a couple (1) months after finishing my degree.

I had applied (2) several jobs in different companies, but this was the one I really wanted, so I was delighted.

Working in an environmental organisation is an amazing experience. I am a research assistant in the laboratory, working with a great team. Since I started here, I (3) met a lot of interesting people who are studying the effect of climate change on our planet.

I think that protecting the environment is one of (4) most important issues in our world today, and I want to help in any way I can, so this is a great opportunity for me. To begin with I don't have a very high salary, (5) I'm happy to get the experience. They are also going to pay for (6) to take some courses to learn more.
