

## LIFE SCIENCE STORIES

### REPTILES

alligators    sun    lizards    scales    eggs    vertebrates    warm

Reptiles are a kind of animal. Reptiles usually live in \_\_\_\_\_ places, but some live in the water. Snakes, turtles, lizards, iguanas, and \_\_\_\_\_ are some common reptiles.

Reptiles are \_\_\_\_\_, so they have backbones. Reptiles have \_\_\_\_\_. Some also have shells. Reptiles are oviparous, they lay \_\_\_\_\_. Most reptiles are carnivores. A few kinds of \_\_\_\_\_ and turtles are herbivores!

Reptiles are cold-blooded. They like the \_\_\_\_\_ because it keeps them warm. If they get too cold, they could die.

Answer the questions! .....

- \_\_\_\_\_ reptiles are carnivores.  
A. NO      B. SOME      C. MOST      D. ALL
- Which of these is a reptile?  
A. SNAKE      B. SALAMANDER      C. BAT      D. SHARK
- What kind of body covering do reptiles have?  
A. FEATHERS      B. SLIME      C. SCALES      D. FUR
- DEFINITION: meat eaters.  
A. OMNIVORES      B. HERBIVOROUS      C. CARNIVOROUS      D. VEGETARIAN
- Reptiles are warm-blooded.  
A. TRUE      B. FALSE
