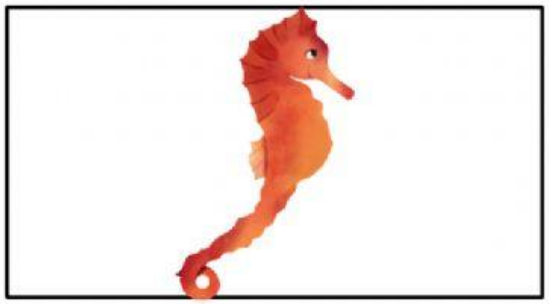
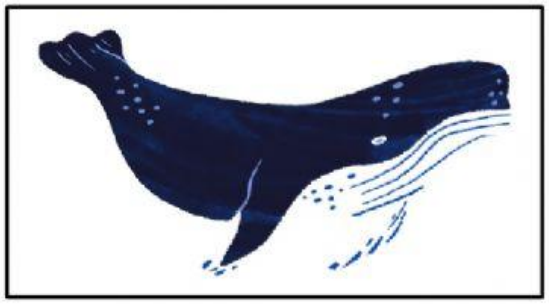
EXERCISE I

Solve the sea creatures riddles.



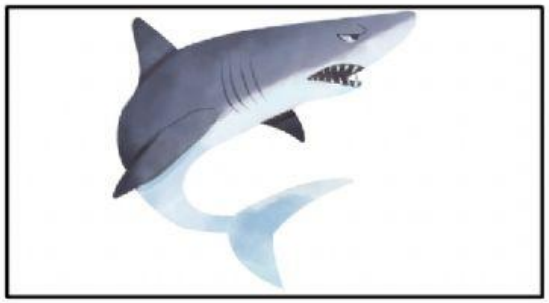
It has many sizes, colorful, and beautiful, and is home to Nemo fish.



A large fish. They are predators that eat fish and other creatures using their sharp teeth and strong jaws.

This mammal is the largest animal in the ocean and on earth. It is usually blue or gray in color.

They are unique in look, with their horselike head, and freely moving eyes, They have long, tubular snouts and toothless jaws.



Sadly, because of humans, I have polluted the sea. I'm floating and hard to get rid of.
