Find the Missing Factors.

1)  $110 = 11 \times \underline{\quad}$

2)  $\underline{\quad} \times 8 = 72$

3)  $\underline{\quad} \times 6 = 66$

4)  $63 = \underline{\quad} \times 7$

5)  $72 = \underline{\quad} \times 6$

6)  $7 \times \underline{\quad} = 14$

7)  $99 = 9 \times \underline{\quad}$

8)  $3 \times \underline{\quad} = 27$

9)  $88 = 11 \times \underline{\quad}$

10)  $6 \times \underline{\quad} = 12$

11)  $24 = 3 \times \underline{\quad}$

12)  $25 = 5 \times \underline{\quad}$

13)  $\underline{\quad} \times 7 = 49$

14)  $60 = \underline{\quad} \times 5$

15)  $2 \times \underline{\quad} = 12$

16)  $50 = \underline{\quad} \times 5$

17)  $40 = 10 \times \underline{\quad}$

18)  $\underline{\quad} \times 5 = 45$

19)  $16 = \underline{\quad} \times 8$

20)  $56 = \underline{\quad} \times 8$

21)  $6 \times \underline{\quad} = 18$

22)  $14 = \underline{\quad} \times 2$

23)  $10 \times \underline{\quad} = 60$

24)  $36 = 9 \times \underline{\quad}$

25)  $10 = \underline{\quad} \times 2$

26)  $7 \times \underline{\quad} = 42$

27)  $\underline{\quad} \times 11 = 55$

28)  $\underline{\quad} \times 2 = 16$

29)  $\underline{\quad} \times 3 = 6$

30)  $40 = 4 \times \underline{\quad}$
