

Name: _____

The Skip Counting Mouse

Help the mouse find the cheese.
Count by 2s. Fill in the missing numbers.

The path starts at a mouse on the left and ends at a wedge of Swiss cheese on the right. The path is marked by a series of circles containing numbers or blanks, connected by dashed arrows. The sequence of numbers is: 2, 4, a blank circle, another blank circle, 12, a blank circle, 18, and a final blank circle before the cheese. The path winds from the mouse, goes right to 2, then right to 4, then left to a blank circle, then left to another blank circle, then right to 12, then right to a blank circle, then left to 18, then right to a blank circle, and finally right to the cheese.
