Multiplying and dividing integers: First predict which problems will have a positive answer and which will have a negative answer. Then simplify each problem. (3 pts. each)

Simplify:	**Predict**
(-5)(+4)	
(-5)(-4)	
(+5)(+4)	
$\frac{+12}{-2}$	
$\frac{+12}{+2}$	
$\frac{-12}{+2}$	
$\frac{-12}{-2}$
