

Choose the vocabulary term that matches each photo and caption.

<p><b>1</b></p> <p>_____</p> <p>This is what it's called when a seed starts to grow.</p> 	<p><b>2</b></p> <p>_____</p> <p>Some plants do not have flowers to help them reproduce. Instead, they have this plant part.</p> 
<p><b>3</b></p> <p>_____</p> <p>This is what plants do to make more plants.</p> 	<p><b>4</b></p> <p>_____</p> <p>This is what helps flowering plants produce seeds.</p> 

Drag and drop to fill in the missing words to tell about the life cycles of plants.

The different stages that a plant goes through in its life make up its

(5) \_\_\_\_\_. After a seed germinates, it becomes a

(6) \_\_\_\_\_. Insects are one way that (7) \_\_\_\_\_

moves from a male plant part to a female plant part. In a flowering plant, the

(8) \_\_\_\_\_ contains the seeds that will grow into a new plant. Water,

wind, and (9) \_\_\_\_\_ carry seeds to new ground. Plants like mosses

make (10) \_\_\_\_\_ but do not make seeds when they reproduce.

life cycle

pollen

animals

seedling

spores

fruit

Choose the correct option to complete the puzzle.

### Across

3. The stages that a plant goes through in its life are called its \_\_\_\_\_.
5. The colorful part of a plant that helps it reproduce is called a \_\_\_\_\_.
7. When a seed \_\_\_\_\_, it breaks open and a small plant grows out of it.

### Down

1. \_\_\_\_\_ happens when pollen moves from the male part of a plant to a female part.
2. The powder-like material that helps plants reproduce is called \_\_\_\_\_.
4. Plants that make seeds but do not produce a fruit produce a \_\_\_\_\_.
6. When a seed plant \_\_\_\_\_, it makes seeds that will grow into new plants.
8. A \_\_\_\_\_ is the only structure that ferns use when they reproduce.

In each picture, tell whether seeds or pollen are being moved.
