

LESSON 6: WHAT DO LIVING THINGS NEED?

1. READ AND FILL IN THE BLANKS

TEMPERATURE	SURVIVE	ENVIRONMENT
HEAT	NEED	ENERGY

Sunlight:

It is the source of all _____. It also provides _____ for plants and animals.

Water:

Water is a living _____ for many plants and animals.

Air:

The two most important gases are Oxygen and Carbon dioxide. Without oxygen, animals will die, and without carbon dioxide, plants cannot _____.

Food (nutrients):

Living things _____ energy for function. Energy is needed to grow, reproduce, move, and to work.

A Habitat with the Right Temperature:

Too cold or too hot? Every living organism needs the ideal _____ to survive either on land or in water.
