

Tools in the workshop

1. Drag and drop the different parts of a flat screwdriver and a bolt:

2. Join the part of a pair of scissors with their function:

Spindle screw	are made of steel.
Blades	are in the handle.
Fingers hole	is normally made of plastic glued to steel.
Handle	is where the steel blades join.

3. Complete the text with the appropriate words about pliers:

The most common use of the pliers is to _____ objects, for example to undo a _____ or to bend a _____.

Pliers have parallel _____, a _____ where the handle join, and parallel _____ that grip the object.
