Reykjavik in Iceland is one of the world's healthiest cities. Its people often do activities outside, even though it's very cold. They go hiking, and swimming outside! Also, Icelandic people eat more healthy, fresh fish - it is an island, after all.

Tehran, the capital city of Iran, is not a healthy place to live. The air pollution is very bad, so people stay at home on 'smog holidays' – days when the air is full of smoke and it is unhealthy to go out.

Glasgow in Scotland has a problem with obesity. Almost 40% of people in this city are obese. Scotland is cold. Here that means people watch more TV, play more computer games, and do less exercise than in other countries. They also eat a lot of junk food.

Due to the Mediterranean diet, the Spanish suffer from fewer diseases than the rest of the world. Physical health is important, but mental health is important too.
