ventilator
shivering
brainwaves
bpm
abnormality
ultrasound
co-ordination

3.

Read the example report about the fatal symptoms of one patient. Use the notes in the box to write a similar report about a patient with symptoms of an angina attack.

Example Report

The victim was a 60-year-old man. Two days ago he complained of a bad cough and said he felt nauseous. Yesterday his ankles and feet were swollen and he told his wife that his fingers were numb. At two o'clock in the afternoon he felt dizzy, fell over and lost consciousness. He died of heart failure in the ambulance.
