

Future Inventions

 Read the following article about future inventions

AI-enabled robots in Future Technology

The current **technology trends in 2020** seem bright in terms of humans working in parallel with robots.

A lot of being said about AI taking away human jobs, but on the contrary, experts have stated that AI is expected to create up to 3 new job opportunities instead of 1 job it takes.

This means we shall be able to witness a high performance, efficiency, and proper strategy and planning across major sectors.

Space tourism with the help of Future Technology

SpaceX has already taken the lead in developing a sustainable space tourism model, and there are other competitors as well as working in this avenue.

This is a huge driver in terms of job creation opportunities, new business avenues within the core business, and further marketing and sales opportunities that shall impact the top line of businesses substantially.

Self-driving cars because of Future Technology

Here is a popular future technology idea that is being widely researched and nearing implementation on a full scale.

Self-driving cars have received a major boost owing to multiple positives that it arrives with. With machines taking over, a seamless ecosystem of such cars can emerge that can result in fewer accidents, quicker transit times, and lower human fatigue which further impacts business productivity positively.

Drone Ecosystem

Drones are slowly taking over, especially for surveillance and mapping purposes. Military applications of drones are also highly sought after.

And now companies like Amazon and Jubilant Foodworks are employing drones for the delivery of goods and pizzas respectively.

This is quite an insight into the future as drones might form the basic ecosystem of the entire logistics industry by 2050.

Virtual Reality

A lot of fields are currently exploring VR-AR. But from an absolute business point of view, some avenues to explore can include academics, employee/customer onboarding, training, tourism such as; adventure sports, and for overall immersive entertainment. We can definitely see a lot of these applications by 2050.

- Complete the following descriptions with the correct invention

It impacts business productivity in a positive way.

_____.

Humans working in parallel with robots.

_____.

Entertainment is exploring this technology.

_____.

Some companies use this for the delivery of goods and pizzas.

_____.

This is a huge driver in terms of job creation opportunities.

_____.

- Choose two of the previous technological inventions.
- Complete the information asked below with your opinion.

1. Mention one function the invention is going to have.

_____.

2. Mention how this invention is going to help people.

_____.

1. Mention one function the invention is going to have.

_____.

2. Mention how this invention is going to help people.

_____.
