

Cell Vocabulary 2

What type of cells are these?

These cells are very basic.
They do not have a
nucleus.

ANIMAL CELL

These cells are more
complicated and have
organelles contained by
membranes, which is like a
bag for all of the cell's stuff!

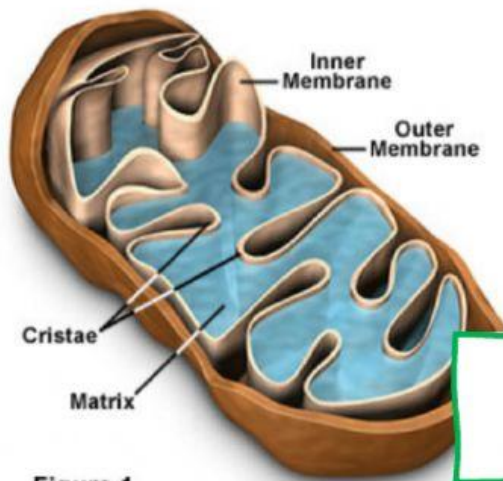

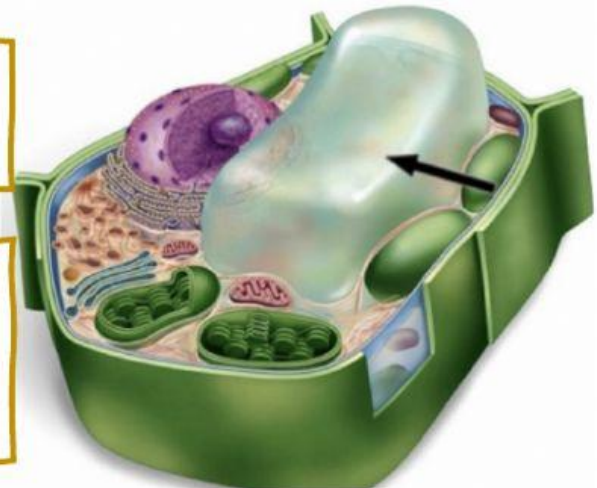

Figure 1

Makes energy. It is the 'powerhouse' of the cell.

Only in plant cells. They take water.

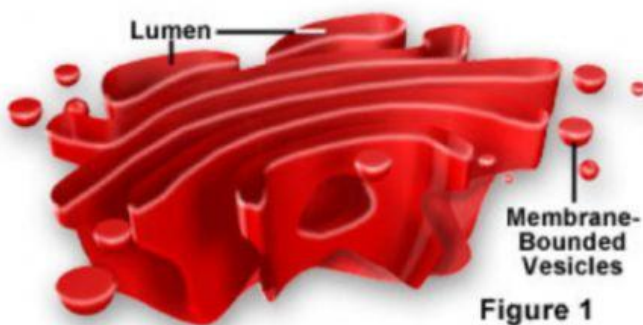

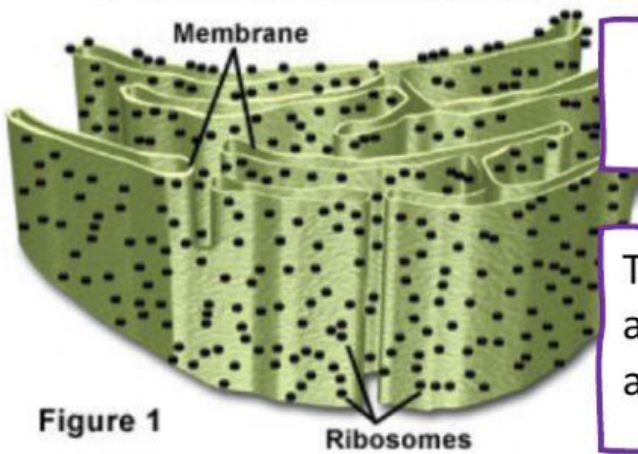

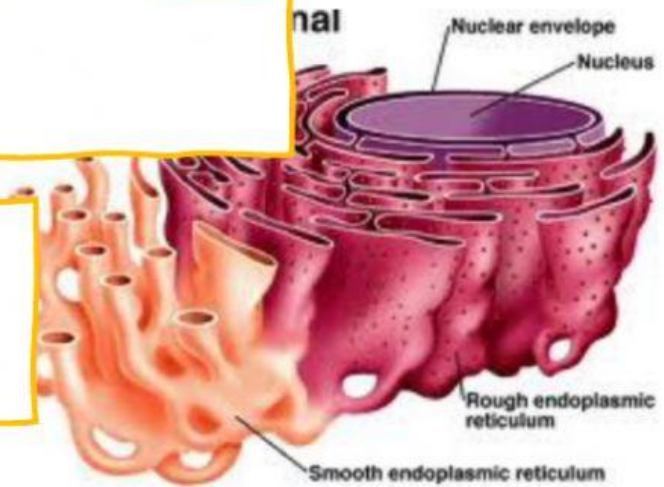

Figure 1

Golgi body.

Takes proteins and sends them to other parts of the cell.

Creates lipids and fat.

This is covered in ribosomes and is where many proteins are made.

Creates protein!
