

BASIC CONCEPTS OF ASSESSMENT

ACROSS

DOWN

3. It makes a judgment about the classroom or the whole program. TOEFL is an example.
7. Its purpose is to gather information from students in order to interpret it and make judgments about students' performance.
8. It is a process and we can obtain numerical descriptions of specific characteristics of a classroom, objects, systems or events.
9. Theory that provides students with the tools to be able to build their own knowledge.
10. It is an instrument. It is scored and subsequently judged using a standardized process.

1. It's a broad set of theories and practices that emphasize concepts such as reinforcement, stimulus-response association and operant learning.
2. It is the effect of testing on teaching and learning. The effect can be harmful or beneficial.
3. Learning a memorization technique based on repetition.
4. Teaching methods and learning activities that a teacher uses to deliver the curriculum in the classroom. The term _____ and "teaching" are often used interchangeably.
5. It is the process in which the teacher tells a child how they have done in their learning and what they need to do to improve further.
