Este es el método de Raúl para calcular la diferencia entre 5000 y 2487.

$$5000 - 2487 = \boxed{\quad ? \quad}$$

$$5000 - 2487 = \boxed{2513}$$

$$4999 - 2487 = 2512$$

$$2512 + 1 = 2513$$

**1** Usa el método de Raúl y completa:

a)  $\boxed{8000} - \boxed{5489} = \boxed{\quad}$

$$\boxed{\quad} - \boxed{\quad} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

b)  $\boxed{6002} - \boxed{2523} = \boxed{\quad}$

$$\boxed{\quad} - \boxed{\quad} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

b)  $\boxed{8001} - \boxed{3537} = \boxed{\quad}$

$$\boxed{\quad} - \boxed{\quad} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

**¡Bien hecho!**
