

# Solar Power

Fill in the Blank: Solar power is energy obtained by harnessing the sun's \_\_\_\_.

- a. Gases
- b. sunlight

Fill in the Blank: In concentrated solar power, sunlight is \_\_\_\_ into a small beam.

- a. Reflected
- b. pulled into

True or False: Solar panels convert sunlight into AC electricity, and then into DC electricity.

- a. True
- b. False

True or False: Solar Power is a renewable source of energy.

- a. True
- b. False

True or False: Solar Power is high maintenance.

- a. True
- b. False

**True or False: Solar Power does not require a lot of space.**

- a. True
- b. False

**True or False: Solar Power energy storage is expensive.**

- a. True
- b. False

**Which of these environmental impacts are associated with solar power?**

- a. land use
- b. water use
- c. habitat loss
- d. All of the above

**Which country uses the most solar power?**

- a. United States
- b. Germany
