

Nombre: _____ Número: _____ Curso: _____

Este es el método de Raúl para calcular la diferencia entre 5000 y 2487.

$$5000 - 2487 = \boxed{\quad ? \quad}$$

$$5000 - 2487 = \boxed{\quad 2513 \quad}$$

$$4999 - 2487 = 2512$$

$$2512 + 1 = 2513$$

1 Usa el método de Raúl y completa:

a) $\boxed{6000} - \boxed{5217} = \boxed{\quad}$

$$\boxed{\quad} - \boxed{\quad} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

b) $\boxed{4002} - \boxed{2359} = \boxed{\quad}$

$$\boxed{\quad} - \boxed{\quad} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

b) $\boxed{7001} - \boxed{3225} = \boxed{\quad}$

$$\boxed{\quad} - \boxed{\quad} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

¡Bien hecho!
