

EARTH'S CLIMATE ZONES

- 1) Complete the map with the climate zones: POLAR AND MOUNTAIN CLIMATE, TEMPERATE CLIMATE AND TROPICAL CLIMATE.

- 2) Write TRUE or FALSE:

- In polar and mountain zones they have low temperatures all year
- You can find temperate zones in deserts, jungles and savannahs
- Temperate zones have temperatures between 0 and 20 degrees depending if it is Winter or not
- In tropical zones the amount of precipitation varies depending if it is a desert, a jungle or the Savannah.....
- In tropical zones the temperatures are high.....
- There is never any precipitation in polar and mountain zones

- 3) WRITE THE EARTH'S CLIMATE CHANGE YOU CAN SEE IN THE PICTURES.
