

## CLIMATES \_ UNIT 2

1- Complete:

## CLIMATES \_ UNIT 2

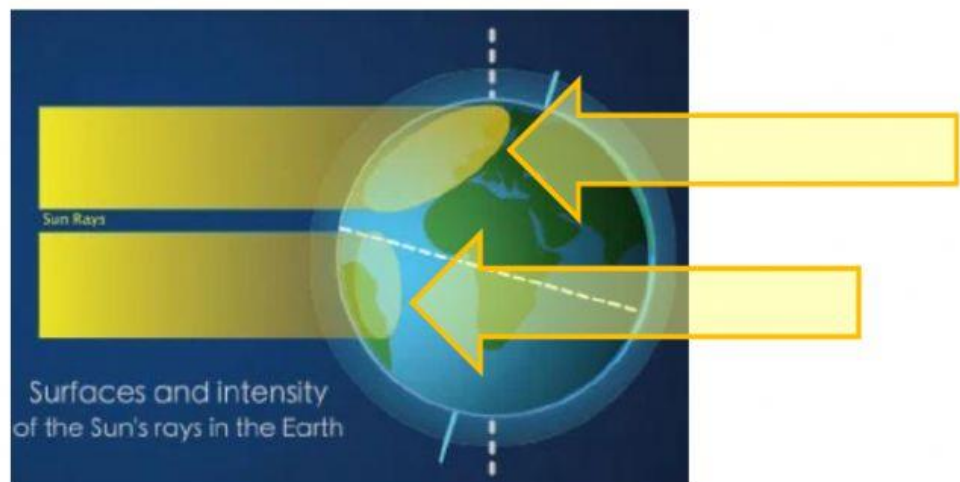

### 2- Complete:

The \_\_\_\_\_ doesn't heat the Earth's surface evenly. Because of that each zone of the Earth has a different \_\_\_\_\_ depending on its latitude and altitude.

\_\_\_\_\_ → Around the equator, the Sun's rays hit the surface \_\_\_\_\_ and the temperatures are \_\_\_\_\_.

\_\_\_\_\_ → Far from the equator and near the poles, the Sun's rays hit the surface \_\_\_\_\_ and the temperature is \_\_\_\_\_.

\_\_\_\_\_ → Higher places are \_\_\_\_\_.

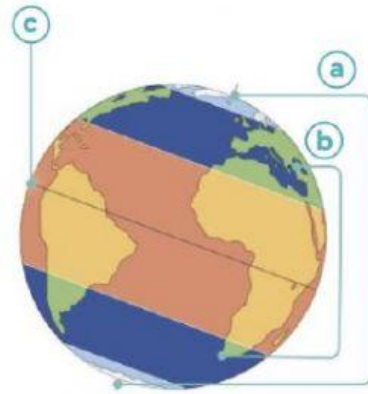

### 3- High or low atmospheric pressure?

|  |  |
|--|--|
| Depressions                            |  |
| Anticyclones                           |  |
| Warm air masses hold more water vapour |  |
| Warm air rises                         |  |
| Cool air doesn't rise                  |  |
| Clouds are formed                      |  |
| Dry and sunny weather                  |  |
| Clouds aren't formed                   |  |
| Rain or snow                           |  |

## CLIMATES \_ UNIT 2

4- Complete about the climate zones:

- Polar zones \_\_\_\_\_
- Temperate zones \_\_\_\_\_
- Tropical zones \_\_\_\_\_

Well done!
