## A Good Night's Sleep

Insomnia is a sleep disorder in which a person has difficulty falling or staying asleep. 1) .... we all experience the occasional sleepless night, people with insomnia suffer them regularly over a long 2) .... of time. Naturally, this has a very negative impact on a person's daily life, as they often feel too tired to do normal activities properly. In fact, insomnia can also cause mood swings, low concentration levels and even serious health problems. So, what's the solution? Well, one choice is to take pharmaceutical medicines, but 3) .... often contain addictive chemicals. Instead, a better option is to use natural remedies and do calming exercises. For example, stress is a leading cause of insomnia, so it's a good idea to 4) .... it by doing things that relax you, such as yoga, meditation or simply listening to calming music. For example, some people like to listen to the sounds of waves or rain to help them fall asleep. It's also best 5) .... over-stimulating your brain before bedtime, which means no caffeine drinks, sugary snacks or TV after 8 pm! Generally, it's important to remember that insomnia is common and curable; you just have to find what works for you. After all, it's nothing to lose sleep over!
