

SUMA – LAS PESTAÑAS

A number line diagram showing three addition problems. The first problem is 26 + 17, the second is 15 + 30, and the third is 18 + 28. Each problem is represented by a number line with arrows indicating the addition process.

Diagram illustrating the addition of two numbers to find a sum:

$$\boxed{} + \begin{array}{r} 48 \\ 14 \end{array} = \boxed{}$$

$$\boxed{} + \begin{array}{r} 18 \\ 36 \end{array} = \boxed{}$$

$$\boxed{} + \begin{array}{r} 21 \\ 43 \end{array} = \boxed{}$$

A number line diagram showing three addition problems. The first problem is 44 + 24, the second is 30 + 10, and the third is 28 + 41. Each problem is represented by a number line with arrows indicating the addition process.

A number line diagram showing three addition problems. The first problem is 35 + 14, the second is 15 + 45, and the third is 38 + 34. Each problem is represented by a number line with arrows indicating the addition process.
