

Read the features and place the words where they belong. Scroll down for options

| App features                       | Native app | Hybrid app |
|------------------------------------|------------|------------|
| Programming Language               |            |            |
| Platform                           |            |            |
| Performance                        |            |            |
| Speed                              |            |            |
| Developing Time                    |            |            |
| Customer Satisfaction              |            |            |
| User Interface                     |            |            |
| Codebase                           |            |            |
| Access To Device-Specific Features |            |            |
| Access To Mobile Devices Hardware  |            |            |
| Access To Native API's             |            |            |
| Development Cost                   |            |            |

Use the words below: (some options can be used more than once)

High - more - fully - slower and less reliable - limited - moderate (x2) - medium - native only  
 all - high (x2) – expensive - base on app performance - faster and more reliable - affordable  
 never give user a fully native experience – less - functionality rich and more attractive  
 single platform - separate for native platform - HTML CSS JavaScript - multi-platform  
 - single for all platform
