

TEST UNIT 5: Virtual Reality

1. Vocabulary

Listen and number the object

2. Choose the correct answer

7. Is there a flute? a. Yes there is b. No, there isn't	8. Is there a wizard? a. Yes there is b. No, there isn't	9. Are there any arrows? a. Yes there are b. No, there aren't
10. Are there any cats? a. Yes there are b. No, there aren't	11. Is there a mirror? a. Yes there is b. No, there isn't	12. Are there any spiders? a. Yes there are b. No, there aren't

3. Complete using there is/ there are/ there isn't/ there aren't.

13. _____ some carrots
14. _____ a chicken
15. _____ any cherries
16. _____ a chocolate bar
17. _____ a cake
18. _____ some apples
19. _____ some eggs

4. Read and answer TRUE or FALSE

Virtual reality for astronauts

Hi, I'm Laura. I'm an astronaut on the International Space Station. There are always three astronauts living on the space station. The space station is three hundred kilometres above the Earth. It orbits the Earth sixteen times a day. Sometimes astronauts wear a spacesuit and go outside the space station. We do repairs and experiments. We call this a spacewalk. It is amazing, but it can be dangerous too. Before we go to the space station, we practise spacewalks in a virtual reality laboratory. In the laboratory, we wear a headset and special gloves. When I'm wearing the headset, I can't see the laboratory. I can see the space station, the sky and the Earth. It's exactly like being in space. With the gloves, I can touch objects, use machines and do repairs.

Flight simulators for pilots

Hi, I'm Daniel. I'm a pilot from London, in the UK. Every day, I fly a plane with four hundred passengers. We fly ten kilometres above the Earth and our speed is usually eight hundred kilometres an hour. It's important for pilots to practise flying. In the airport, there's a flight simulator. It's the same as the cockpit of a plane. We don't wear a headset or special gloves in the simulator. When we look through the window, we can see an airport or the sky. We sit in the simulator and we practise flying a plane. In the simulator, we can use the controls with our hands. We can talk to air traffic control too. It's exactly the same as flying a plane. We practise flying at night and flying in a storm pace. With the gloves, I can touch objects, use machines and do repairs.

- 1 _____ Laura works at the International Space Station.
- 2 _____ There is no way to practise space walks.
- 3 _____ For astronauts, virtual reality needs a headset.
- 4 _____ Daniel is a pilot from the USA.
- 5 _____ There is a flight simulator in the airport.
- 6 _____ For pilots, virtual reality needs a headset.
