

### EXERCISE 3

Complete the interview with **will** or **won't** and the verbs in brackets. The first one has been done for you.

**A :** How will people travel (How people travel) around in the future?

**B:** In cars that don't have anybody driving.

**A:** Isn't that dangerous?

**B:** No, the cars \_\_\_\_\_ (communicate) with each other and make sure they all have enough space on the road.

**A:** That's amazing!

**B:** Yes, it is. There \_\_\_\_\_ (are not) any crashes ever again.

**A:** Will the cars be able to fly?

**B:** Maybe – I can certainly imagine a car that flies.

**A:** And food – \_\_\_\_\_ (what people eat)?

**B:** Similar meals to the ones we eat today, but with a lot less meat.

**A:** Why is that?

**B:** Well, in the future, if we want to continue to eat as much meat as we do now, we \_\_\_\_\_ (need definitely) more space for animals than we actually have on the planet.

**A:** I see. Maybe we could build farms on the moon?

**B:** Hmm ... I'm not sure that \_\_\_\_\_ (be) possible.

**A:** Why not? It's a great idea!

**B:** Well, \_\_\_\_\_ (how the animals breathe) when they are on the moon?

**A:** That's a good point.
